

## APPROVED IN ACCORDANCE WITH THE EUROPEAN STANDARD 2014/34/EU - ATEX

These instruments, intrinsically safe certified:

**CESI 03 ATEX 265 Ext.2 II 1G Exia IIC IIB T4/T5/T6 Ga**, are used to control the level of liquids or fuel in tanks, both underground and outdoors, installed in hazardous areas where flammable products are treated.

A wide range of standard units available with connection cable in lengths of 1.5 m and 3,0 m, other lengths are available on request.

The cable is sealed inside the rod with epoxy resin and curing is performed in an oven at controlled temperature.

The only moving element is the float that moves for buoyancy; this ensures a high strength and a limited need for maintenance.

- **Brass – AISI-316 – PVC – Polypropylene – PVDF**
- Maximum working pressure 50 bar depending on used float.
- Standard working temperature up to 100°C.
- Executions up to 150°C on request.
- Operating ambient temperature  
-40/+40°C = T6, -40/+55°C = T5, -40/+80°C = T4
- Minimum degree of protection IP65.
