NEW

Simulating sensors & saving time

The new GHM SensorSimulator SIM-1

Members of GHM GROUP:

GREISINGER
HONSBURG

Martens

IMTRON

DeltaOHM

VAL.CO

The ideal device for commissioning, maintenance and debugging:

Simulation of different sensor types

- voltage $\pm 10\text{V}$
- current $\pm 25\text{mA}$
- strain gauges
- thermo couples type K, J, N, S
- Pt100
- frequencies (optional)

Measuring function

- voltage $\pm 30\text{V}$
- current $\pm 30\text{mA}$

Your benefits

- fast monitoring of measuring chains and transducers
- simulation of various sensor types
- integrated measuring function for voltage and current
- value setting by a clear menu structure
- graphical display with backlight (dimnable)
- cable with clamp terminals for easy connectivity
- very good price-performance ratio
- Made in Germany

We are looking forward to your request:
