

Return Material Authorization

To fulfill the legal regulations for the protection of the environment and our staff, we have to make sure that returned devices which had contact with liquids can be handled without danger.

The repair can be done quickly and without any further questions if the following points are fulfilled:

- every device must be delivered with a completed form
- the device is free of hazardous substances and a packaging is used which prevents damage to the device
- if the device was in contact with a critical media, a safety data sheet of the media must be fixed on the cover of the package

Device: _____

Type: _____

Serial number: _____

Reason for return / fault description:

- Device for repair Device for calibration Device for disposal

The device was in contact with following media: _____

The medium is hazardous to water toxic caustic flammable others _____

If it cannot be guaranteed that the batteries/rechargeable batteries are in perfect condition (e.g. mechanical damage, leaking batteries), they must be removed from the device before being returned and disposed of/ delivered separately at the designated collection points.

The device was completely cleaned for shipment.

We confirm that there is no danger for the environment and for humans handling through the device.

To improve our after-sales service, we have standardized our goods return process. For returns from EFTA countries (IS, LI, NO, CH) and third countries, please contact Ms. Jaax regarding the documentation for the custom before you send back goods to us. Contact: **info@ghm-messtechnik.de**
